

The scatter plot displays the frequency of four classes (g, r, i, z) across a range of values from 56300 to 57400. The y-axis represents frequency, ranging from 0 to 100. The x-axis represents a numerical value. The 'g' class (purple) shows a prominent peak around 56600 and 57300. The 'r' class (cyan) and 'i' class (green) are clustered around 56600 and 57300. The 'z' class (orange) is distributed across the entire range, with a notable outlier at approximately 56900.
