

A scatter plot showing the distribution of four classes (g, r, i, z) in the (RA, Dec) plane. The x-axis represents Right Ascension (RA) from 56300 to 57400, and the y-axis represents Declination (Dec) from 10 to 25. The legend indicates: g (purple), r (blue), i (green), and z (orange). The plot shows several distinct clusters of points, with the 'z' class (orange) being the most numerous and widely distributed. The 'g' class (purple) has a few isolated points, including one at the top right. The 'r' (blue) and 'i' (green) classes are more concentrated in the central and right-hand clusters.
