

This scatter plot shows the distribution of four classes (g, r, i, z) in the 56300-57400 range. The x-axis is labeled from 56400 to 57400. The y-axis is unlabeled. The legend indicates: g (purple), r (cyan), i (green), and z (orange). The data points are clustered in four main groups, with a few outliers at the bottom. The classes are well-separated in this range, with 'g' points generally at higher y-values and 'z' points at lower y-values within each cluster.
