

Scatter plot showing magnitude (y-axis, 14.0 to 20.0) versus time [MJD] (x-axis, 56300 to 57400). The data points are categorized by filter: g (purple), r (blue), i (green), and z (orange). The plot displays four distinct clusters of data points, each containing points from all four filters. The clusters are located at approximately 56350, 56600, 57000, and 57350 MJD. The magnitude values within each cluster range from approximately 14.5 to 19.5.
