

A scatter plot showing the distribution of four classes (g, r, i, z) across a range of values from 56300 to 57400. The plot features four distinct clusters of points, each color-coded according to the legend: 'g' (purple), 'r' (blue), 'i' (green), and 'z' (orange). The 'z' class has a notable outlier at the top right. The 'g' and 'r' classes are concentrated in the lower right, while 'i' and 'z' are more spread out across the middle and left sections.
