

A scatter plot showing the distribution of four classes (g, r, i, z) across a 2D space defined by x and y coordinates. The x-axis ranges from 5630 to 5740, and the y-axis ranges from 100 to 250. The classes are represented by different colors: 'g' (purple), 'r' (cyan), 'i' (green), and 'z' (orange). The plot shows four distinct clusters of points, each containing a mix of the four classes, with some outliers. A legend in the top right corner identifies the classes.
