

The figure is a scatter plot showing the time evolution of the color index (g-r-i-z) for a source. The x-axis is labeled 'time [MJD]' and ranges from 56300 to 57400. The y-axis is labeled 'color index' and ranges from 0.0 to 1.0. The data points are colored according to the filter used: g (purple), r (blue), i (green), and z (orange). The plot shows several distinct clusters of points, indicating different states or phases of the source. A legend in the top right corner identifies the filter colors.
