

The figure is a scatter plot with 'time [MJD]' on the x-axis, ranging from 56300 to 57400. The y-axis is unlabeled but represents a numerical value. The data is categorized by filter type: 'r' (purple), 'i' (blue), and 'z' (green). The plot displays four main clusters of data points, each containing a mixture of the three filter types. There are also several isolated points, particularly of the 'r' filter type, scattered across the time range. A legend in the top right corner identifies the filter colors.
