

The figure is a scatter plot showing the evolution of four photometric bands (g, r, i, z) over time (MJD). The x-axis is labeled 'time [MJD]' and ranges from 5630 to 5740. The y-axis is unlabeled but represents magnitude. The legend indicates: g (purple), r (blue), i (green), and z (orange). The data shows three main clusters of points, suggesting periodic variability. A single green point (i band) is an outlier at approximately MJD 5692 and magnitude 16.5.
