

The figure displays a scatter plot with four distinct clusters of data points. The x-axis ranges from 56400 to 57400, and the y-axis ranges from 0 to 100. The clusters are located at approximately x=56300, 56600, 57000, and 57300. A legend in the bottom left corner identifies the colors for each cluster: g (purple), r (cyan), i (light green), and z (orange). The points are scattered around a central horizontal line at y=50, with some outliers above and below. The cluster at x=57300 has a single orange point (z) at y=0.
