

Scatter plot showing time [MJD] on the x-axis (ranging from 56400 to 57400) versus an unlabeled y-axis (ranging from 0 to 20, with a break between 10 and 20). The data points are colored by filter: g (purple), r (cyan), i (green), and z (orange). The plot displays four distinct clusters of points, each corresponding to a different filter, and one outlier point at the top right.
